

Did you know you can set meal ordering preferences with Innovate which will automatically add a meal for set days. This means no more forgotten meals or setting reminders to order, using this option means meals will automatically be ordered as new menus are added. You can still change individual days menus if your child doesn't like a particular dish or you need to order a packed lunch for a trip, any changes would need to be made before 11pm on the Saturday before.

See below for a helpful guide on how to set your meal ordering preferences:

Step 1: Log into Innovate app and click "order lunch"

Step 2: At the bottom of the weekly ordering page you will see this option, Click on "change standard choice"

Standard choice

Register your standard lunch choice, and it will be automatically processed without you having to remember the weekly order. You can always edit your standard choice.

 [Change standard choice](#)

Holiday periods

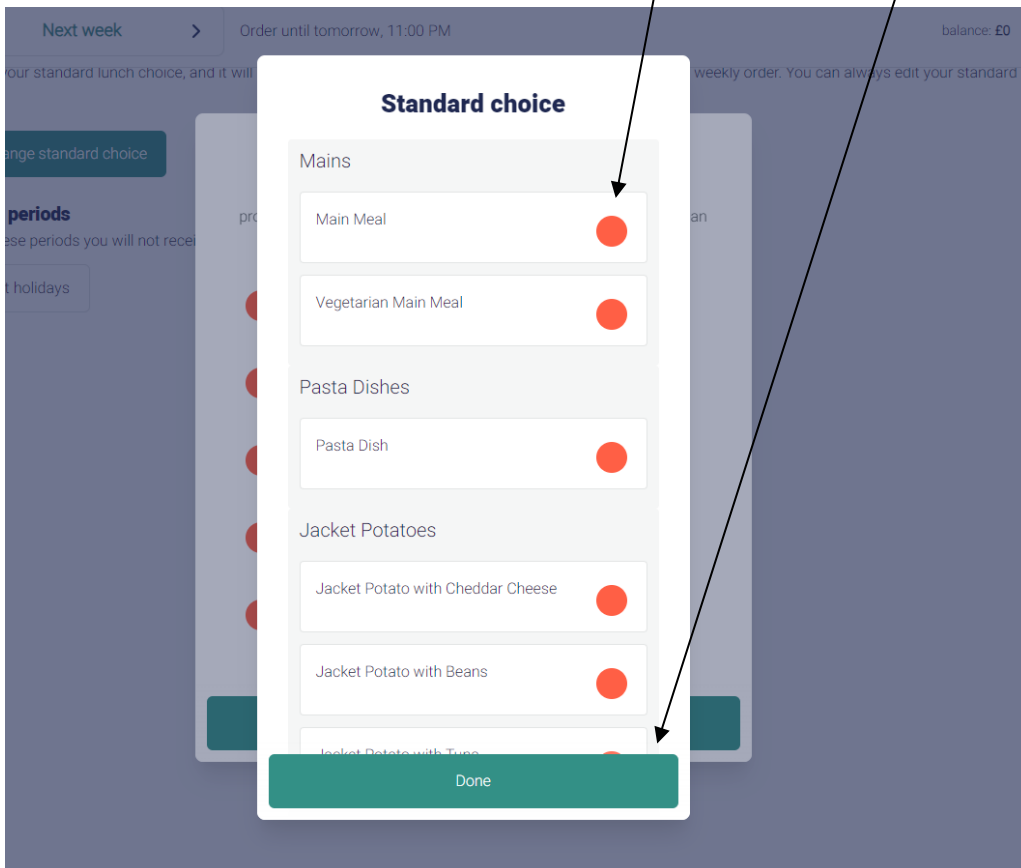

During these periods you will not receive any food.

Step 3: Select which days you wish to order for. You will need to complete this process for every day you want your child to have a school meal.

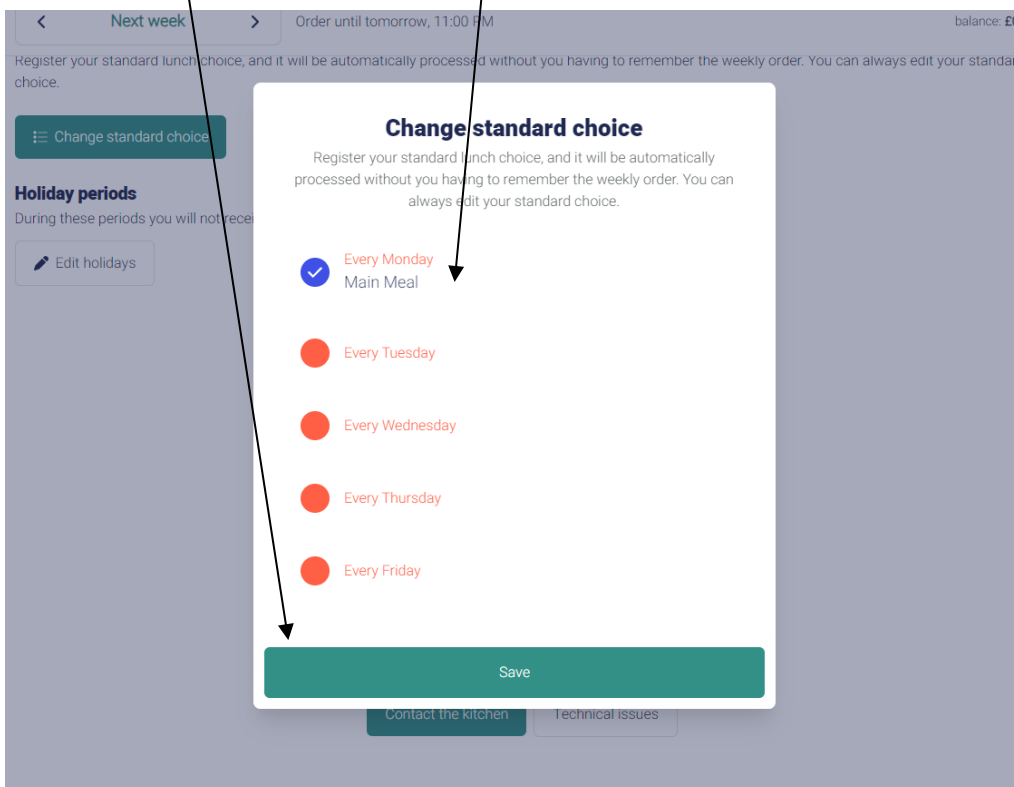

Step 4: Select which meal option you want for that day and then click "done"

Step 5: Select a dessert option and any side dish and confirm

Step 6: Once you have set a meal preference it should look like this Once you are happy click save to finalise your preferences.

You will need to complete steps 3-5 for every day you want your child to have a school meal.
